Subject: Proposal for Asset Management Application

Dear John Doe,

We are pleased to introduce our comprehensive Asset Management and Enterprise Operational Tracking solution for your organization.

The application is readily available on Android, iOS, and Web platforms, offering real-time visibility, traceability, and control over all physical assets — from procurement to disposal. With advanced tracking, scanning, auditing, and reporting features, this system is tailored to reduce manual effort, prevent losses, and ensure complete compliance across departments. The application covers:

- QR code-based asset scanning and unique asset identification.
- Lifecycle and maintenance tracking with predictive insights.
- Asset log and usage trend analytics.
- Role-based validations, daily entry checks, and issue reporting.
- Asset performance monitoring including consumption analytics.

Our solution is modular, scalable, and configurable, built to ensure reliable data, streamlined operations, and audit-ready compliance — all in one platform.

Please find the attached proposal which outlines the detailed features, modules, implementation methodology, and commercial terms.

We look forward to your positive response and an opportunity to move forward with the implementation.

Thanking you,
Madan Kumar S.

Mawalog

Quotation

A. Overview:

This proposal outlines the setup and implementation of the Asset Management module, an integral part of the MAWALOG product suite, crafted to streamline the end-to-end management of organizational assets through a centralized, intelligent platform.

The Asset Management application is designed to provide real-time visibility, lifecycle tracking, and activity monitoring of physical assets—from acquisition to disposal. With built-in support for Android, iOS, and Web platforms, the system enables quick access, scanning, and control of assets, anytime and anywhere.

By combining QR code technology, location tracking, daily usage logging, and predictive insights, this solution empowers teams to reduce manual processes, enhance audit readiness, and make data-driven decisions.

Target Users:

- **Asset Managers:** For asset creation, lifecycle updates, validation, monitoring, and reporting.
- **Department Heads:** For asset check-ins/outs, usage tracking, and movement approvals.
- **Operations/Admin Teams:** For gate activity tracking, audit readiness, and consumption analysis.

The platform is designed to be highly scalable, making it suitable for businesses of all sizes and industries that seek to digitize and optimize their asset infrastructure.

B. Key Features:

- **QR Code Scanning & Asset Tagging:** Quick asset identification and scanning using unique QR codes, reducing manual data entry errors.
- **Real-Time Location-Based Tracking:** Monitor asset locations and movements across locations and departments with complete visibility.
- **Asset Movement History & Gate Logs:** Maintain detailed logs of check-in, check-out, gate entries, and physical movements for traceability.
- **Daily Usage Logging & Activity Records:** Automated logging of daily asset activities, including check-outs, validations, and performance data.
- **Asset Lifecycle Management:** Oversee assets from procurement through disposal with support for maintenance tracking and retirement.
- **Predictive Maintenance & Insights:** Forecast maintenance or replacement needs based on usage and condition trends.

- **Custom Asset Creation & Listings:** Create assets with detailed attributes such as type, name, tag, invoice details, and maintenance schedules.
- **Asset Validation & Inspection Logs:** Perform daily checks and validations with status updates and reporting options for issues.
- **Gate Log & Usage Analytics:** Analyse weekly, monthly, and yearly trends in asset movement and usage frequency.
- **Editable History Logs:** Full audit trail of every modification made to asset records, including who made the change and when.
- **Report Generation Module:** Customizable reports with filters such as location, department, asset type/status, and usage, exportable in Excel format.
- **Dashboard Overview:** Visual insights and KPIs such as asset counts (total, in use, under repair, scrapped), location usage, and performance metrics.

C. Implementation Methodology:

The following methodology outlines the deployment strategy and ongoing support structure for the Asset Management application, ensuring a structured rollout and sustained operational support for subscribing organizations.

- **Initial Configuration & Onboarding:**
  - A brief requirement gathering session will be conducted to capture asset categories, department structures, and validation workflows.
  - Standard onboarding documentation will be provided to collect organization details, key asset types, role permissions, and preferred modules.
  - Application environment will be initialized with branding, default asset types, validation checkpoints, and role-based access settings.
- **Subscription & Licensing:**
  - **Minimum Number of Assets**: **500 Assets (initial setup)**
  - **Implementation Duration: 1 Weeks**
  - The application will be offered as a subscription-based model, with billing on a monthly or annual basis as per the selected plan.
  - Applicable taxes will be charged separately.
- **Go-Live & Access:**
  - Following initial setup and configuration, the Asset Manager and designated users will be given training and access for testing.
  - A formal go-live sign-off will be obtained after successful validation and feedback.
  - Admin credentials and full system access will be shared upon go-live confirmation.
- **Support & Maintenance:**
  - **Bug Resolution:** Any issues or bugs identified post-deployment will be resolved free of charge during the active subscription period.
  - **Support Channels:** All support requests must be raised through our ticketing system or official email.

- **Support Hours:** Monday to Friday, 10 AM – 6 PM IST.

D. Product Onboarding & Implementation Plan

The Asset Management application follows a structured and streamlined onboarding approach to ensure smooth deployment and rapid adoption. As a configurable and ready-to-use platform, the focus lies on accurate setup, user enablement, and real-time operational readiness.

- **Onboarding & Account Setup**
  - Setup of a dedicated application environment for the organization, including custom branding.
  - Role-based account configuration for key user categories (e.g., Asset Managers, Admins, Department Heads).
  - Module access provisioning based on subscribed scope (e.g., Asset Creation, Validation, Checking, Reports, Gate Logs).
- **Master Data Configuration**
  - Upload and configuration of essential asset-related master data:
    - Employee details
    - Location mappings and department linkage
    - Assignment validators, and usage frequency
  - Data import templates will be provided to the client.
  - Accurate and timely data submission by the client is critical for adhering to implementation timelines.
- **User Training & Access**
  - Structured training sessions for all primary users (virtual or in-person based on feasibility).
  - Module-wise demonstrations for workflows such as scanning, validation, movement tracking, daily entries, and reporting.
  - Access credentials will be shared after training, and testing will be conducted to ensure readiness.
  - Participation of designated users during training is vital to ensure smooth operational transition.
- **Module Activation & UAT**
  - Activation and testing of core modules including:
    - Asset Creation & Listing
    - Validation & Checking
    - Daily Entry Logging
    - Gate Log Monitoring
    - Reporting & Lifecycle Tracking
  - End-user testing and feedback collection before final deployment.

- **Go-Live & Support**
  - Final review and confirmation for go-live.
  - Handover of admin access and system credentials.
  - Dedicated support during rollout and transition.
  - Ongoing ticket-based support post go-live for issue resolution and clarifications.

E. Project Implementation Schedule:

S. No	Activity	Duration
1	**Onboarding & Setup**	**1 Week**
2	**Training & UAT**	**1 Week**
3	**Go Live**	**1 Week**

F. Quote Value:

S. No	Particulars	Amount INR	Remarks
1.	Onboarding & One-time Implementation	50,000 INR / One time	• 60% - Advance 40% - Sign off • 2.
2.	Special Pack	30,000 INR / Per Year	• Support Detail • Any issues related to existing features and core functionalities will be addressed with high priority. • Reported issues will be resolved within 2 working days, depending on complexity and severity.

G. Support Detail

- Any issues related to existing features and core functionalities will be addressed with high priority.
- Reported issues will be resolved within **2 working days**, depending on complexity and severity.
- Ongoing support covers bug fixes, basic usage queries, and assistance with standard features.

- Customization requests or new feature development are **not** included in the subscription and will be billed separately.
- Support include time spent on queries, clarifications, guidance, or troubleshooting.
- Each support request will be logged as a separate ticket for tracking and resolution.
- Initial configuration and user training will be provided once during onboarding.
- A detailed **User Guide** will be shared post-implementation for future reference.

H. Terms & Conditions

○ GST extra as applicable.
○ Support invoice will be released in the beginning of the year and payment to be settle within 10 days.
○ Delivery timeline subject to + / - 10%.
○ Installation and Demo: Free at your place/online.
○ Validity: 15 days from the date of Quotation.
○ Order once placed cannot be cancelled under any circumstances.
○ Taxes: Exclusive of all applicable tax.
○ Initial setup and training will be provided once.
○ Any further customization is chargeable.
○ After sign-off of requirements, changes are to consider as Change Request and commercial will require mutual discussion on subsequent dates.

We always assure you our best services.

We will be happy to serve you & offer you the services that will help you to achieve your new goals.

Thanking you,

Madan Kumar B
